

Section	Policy Number
Special Needs Policy	RCJTC P.02
Date	Revised
September 1, 2010	

1. ACCESSIBILITY PLAN – ROLE

The following chart details the role of the group identified in regard to students with the specified special need.

Special Need	Operator/Driver	Parent/Guardian	School Staff	Student	E.A.	Monitor
Wheelchair	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
Walker or Other Related Mobility Device to Support While Walking	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.

...Providing safe, efficient, effective transportation to our students

Special Need	Operator/Driver	Parent/Guardian	School Staff	Student	E.A.	Monitor
Ambulatory	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
EpiPen®	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Inform driver and/or monitor where the EpiPen® is located. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
Epileptic	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
Diabetic	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.

Special Need	Operator/Driver	Parent/Guardian	School Staff	Student	E.A.	Monitor
Asthma	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
Deaf or Hard of Hearing	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
Developmental	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or concerns.	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.
Autistic	Ensure that students are transported safely according to needs. Follow Consortium Procedures for The Transportation of Special Needs Students. Provide monitor as requested by the Consortium. Contact dispatch in the event of emergency.	Advise school and Consortium of medical conditions and communicate any change on a regular basis. Help identify tools that may help driver and/or monitor while transporting their child. Advise driver, monitor and/or RCJTC of any emergency health issues or	Advise Consortium and parents/guardians of any issues while at school during the day. Help identify tools that may help driver and/or monitor while transporting the student.	Follow vehicle rules. Advise driver and/or monitor of any emergency health issues or concerns.	Help identify tools that may help driver and/or monitor while transporting the student.	Sit with or near student. Monitor any issues or concerns that may arise during transportation. Notify driver in the event of an emergency.

Special Need	Operator/Driver	Parent/Guardian	School Staff	Student	E.A.	Monitor

2. ACCESSIBILITY PLAN – LOADING AND UNLOADING

The following chart details the loading and unloading procedure for students with the specified special need.

Special Need	Loading	Unloading
Wheelchair	<p>When operating a lift to load a passenger with a wheelchair on highways, country roads, city, town or village streets (unless otherwise directed by the Police or RCJTC) the driver must:</p> <ol style="list-style-type: none"> Put the 4-way emergency flashers on as you approach your stop. Ensure unit is stopped in a safe position for the pick-up. Ensure the parking brake has been applied (most ramps will not operate if park brake is not applied). Check that passenger is ready to be loaded onto lift. Check traffic and then activate overhead alternating lights and stop arm as you exit the vehicle (if equipped). Open lift doors and secure them. Deploy and lower the lift and undo the lift safety belt. Back onto lift with wheelchair and set brakes, secure lift safety belt. If power chair be sure to use low gear and turn power off. Keep one hand on the wheelchair and use the other hand to operate the controls. Inform the passenger you are raising the wheelchair lift. Ensure that as you raise the lift the front plate on the lift folds up and locks into position and the power cable is clear of any pinch points. Raise the lift to its fullest extent (level with vehicle floor). Release brakes on wheelchair and load passenger into the vehicle positioning the wheelchair into a tie-down position and reapply brakes. If power chair, use low gear and turn power off. Exit the vehicle and stow the ramp and close doors. Enter the vehicle and turn off the overhead alternating flashing lights and stop arm. Secure the wheelchair with the Q-strait system. <p>SECUREMENT Securing Wheelchair Passengers Note: Each wheelchair must be restrained and made secure as it is loaded onto the vehicle. There shall not be more than one wheelchair loose or free at anytime the vehicle is being loaded. Position the wheelchair, centered and square to the floor anchor points so that the restraint belts will attach to the chair and floor at approximately a 45 degree angle. The smaller front pivoting wheels on the wheelchair should be pointing straight ahead. Note: The chair and passenger must always face forward in the vehicle.</p> <ul style="list-style-type: none"> Apply the wheelchair brakes (manual), or turn off the power (electric chair). Attach the front belts (narrow type) by connecting the large hook to a solid frame member of the chair and connect the opposite end (flat hook) of the belt to the floor anchor point. Pull the belt through the clamping mechanism until all the slack is removed and the belt is snugly attached to the wheelchair. The rear belt clamps will provide the final tensioning of the front belts. Attach the loose end of the belt to the Velcro patch above the clamp. Attach the rear belts by connecting the chair hook to a solid frame member, as close to the point where the wheelchair back and seat cushion meet. Attach the floor hook at the opposite end of the belt into the floor anchor point. 	<p>When operating a lift to unload a passenger with a wheelchair on highways, country roads, city, town or village streets the (unless otherwise directed by the Police or Transportation Department) the driver must:</p> <ol style="list-style-type: none"> Ensure unit is parked in a safe position for the pick-up. Put on 4-way emergency lights. Ensure parking brake has been applied. Go to the wheelchair passenger and remove lap belt, shoulder belt, front 2 floor Q-straits, rear 2 floor Q-straits, and hang up belts. Position the wheelchair to unload, set brakes, if power chair make sure the power switch is off. Check traffic, when ready activate overhead alternating red flashing lights, exit the vehicle and open lift door and secure it. Deploy the lift to floor level. Go back inside the vehicle and push the wheelchair (if power chair turn on power and put in low gear) onto the lift. Set the brakes. If applicable turn off power. With one hand on the chair and the other hand on the control, lower wheelchair to ground level, (remember communicate with your passenger so that he/she knows they are going down). Release brakes and undo the lift safety belt and push the wheelchair (if power chair turn on power and set in low gear) off the lift. A parent/guardian, family member must know that they have to meet you so that you immediately upon unloading can pass the wheelchair from your hands to theirs. If there is not a person to meet the passenger, call dispatch, do not leave the passenger alone. Secure lift safety belt, raise and stow the lift into the vehicle and close the doors. Return to vehicle and turn off your overhead alternating flashing red lights.

Special Need	Loading	Unloading
	<p>Note: Attach the belts only to a solid, welded frame member on the wheelchair. Do not attach the hook to the wheels. Some chairs may come equipped with bolt-on anchor points or sling-straps, which are acceptable. Do not, under any circumstances, cross belts over each other.</p> <ul style="list-style-type: none"> • With the buckle open, pull the loose end of the belt until snug. While holding the loose end with one hand, close the clamp lever down until it securely locks into position. Connect the loose ends of the belts to the Velcro patch to keep the excess belting off the floor. • Check that all the belts are tight and the wheelchair is secure and that it does not have any back and forth or sideways movement. • To attach the lap belts, pass the loose ends of the lap belts around the occupant and downward toward the rear tie-down belts through the gap between the side panels and seat cushion or the gap between the seats cushion and the back rest of the wheelchair. Connect the belt ends to the pin connectors on the rear tie-down belts. <p>Note: The lap belt should be positioned as low as possible over the occupant’s pelvic area and adjusted as tightly as possible. Ensure the belt is not twisted.</p> <ul style="list-style-type: none"> • To attach the shoulder belt, connect the loose end of the belt to the pin connector on either the left or right side of the lap belt. The shoulder belt should be attached to the connector pin of the lap belt depending on which side of the vehicle the wheelchair is located. Use the right side pin if the wheelchair is on the left side of the vehicle and the left side pin if the wheelchair is on the right side. Again adjust the shoulder belt as snugly as possible, making sure the belt does not rub on the occupants neck area. <p>Note: The shoulder belt should lie across the mid-point of the shoulder and travel upward and rearward from that point to ensure that downward force is avoided. Also note that lap and shoulder belts should not be held away from the occupant’s body by wheelchair components or parts such as the wheelchair armrests or wheels.</p>	
Walker or Other Related Mobility Device to Support While Walking	<p>When operating a lift to load a passenger with a 4 point walker on highways, country roads, city, town or village streets (unless otherwise directed by the Police or RCJTC) the driver must:</p> <ol style="list-style-type: none"> a) Put the 4-way emergency flashers on as you approach your stop. b) Ensure unit is stopped in a safe position for the pick-up. c) Ensure the parking brake has been applied (most ramps will not operate if park brake is not applied). d) Check that passenger is ready to be loaded onto lift. e) Check traffic and then activate overhead alternating lights and stop arm as you exit the vehicle (if equipped). f) Open lift doors and secure them. g) Deploy and lower the lift and undo the lift safety belt. h) Back onto lift with walker and set brakes (if applicable), secure lift safety belt. i) Keep one hand on the walker and use the other hand to operate the controls. j) Inform the passenger you are raising the lift. k) Ensure that as you raise the lift the front plate on the lift folds up and locks into position and the power cable is clear of any pinch points. l) Raise the lift to its fullest extent (level with vehicle floor). m) Release brakes on walker (if applicable) and load passenger into the vehicle to the assigned seat. n) Secure walker to wall of vehicle. o) Exit the vehicle and stow the ramp and close doors. p) Enter the vehicle and turn off the overhead alternating flashing lights and stop arm. 	<p>When operating a lift to unload a passenger with a 4 point walker on highways, country roads, city, town or village streets the (unless otherwise directed by the Police or Transportation Department) the driver must:</p> <ol style="list-style-type: none"> a) Ensure unit is parked in a safe position for the pick-up. b) Put on 4-way emergency lights. c) Ensure parking brake has been applied. d) Position the walker to unload on lift, set brakes (if applicable). e) Check traffic, when ready activate overhead alternating red flashing lights, exit the vehicle and open lift door and secure it. f) Deploy the lift to floor level. g) Go back inside the vehicle and help the passenger with the walker onto the lift. Set the brakes (if applicable). h) With one hand on the walker and the other hand on the control, lower walker to ground level, (remember communicate with your passenger so that he/she knows they are going down). i) Release brakes (if applicable) and undo the lift safety belt and walk off with the walker. j) A parent/guardian, family member must know that they have to meet you so that you immediately upon unloading can have someone meet the walker. If there is not a person to meet the passenger, call dispatch, do not leave the passenger alone. k) Secure lift safety belt, raise and stow the lift into the vehicle and close the doors. l) Return to vehicle and turn off your overhead alternating flashing red lights.

Special Need	Loading	Unloading
Ambulatory	<p>Do not use the loading ramp unless authorized.</p> <ul style="list-style-type: none"> • Communicate with the passenger. Ask what help he/she needs. Allow time for response. • Let the passenger set the pace. If the passenger is unable to respond, indicate clearly what you are going to do and what you expect the passenger to do. • If an offer of assistance is declined, stay close by and be ready to assist if circumstances warrant. Secure walking aids in a safe position within reach of the passenger, i.e. crutches. • Follow behind the ambulatory passenger when going up the steps. • Alternate your steps with those of the passenger. In this manner, your feet will be firmly planted and you will be able to give maximum assistance and support while the passenger takes their step. 	
EpiPen®	Students load unassisted and are seated unsecured.	Students unload unassisted.

3. TYPE 1 DIABETES EMERGENCY PROCEDURES

- 3A.1** RCJTC recognizes that, during the trip from home to school and back, it may be necessary to allow students with diabetes the opportunity to self administer the appropriate nourishment in order to avoid insulin shock, and RCJTC supports transportation providers in implementing this measure.
- 3A.2** In accordance with the procedure described below, and subject to the approval of the General Manager of RCJTC or designate, drivers may assist the student.
1. The student's parent/guardian has completed and signed the Diabetes Hypoglycemia Emergency Action Plan.
 2. The student carries on his/her person the appropriate nourishment.
- 3A.3** When a driver assists, he/she does so in accordance with the policy of RCJTC, and applying the "in loco parentis" principle, not as a health professional.
- 3A.4** This request will remain valid until the student's pathological condition requires a new statement. It is the responsibility of the child's parent/guardian to notify the General Manager of RCJTC or designate, about any changes and to ensure that appropriate nourishment can be found in its designated place. It is the responsibility of the parent/guardian to inform drivers about the location of the food/drink on the student's person. It is not the responsibility of the driver to carry or store these foods or drinks.
- 3A.5** Each year, the General Manager of RCJTC or designate, shall provide the following information to the transportation operators, who in turn must provide this information to the drivers and the appropriate staff members:
- the name of the students who have been identified as having Type 1 Diabetes;
 - their route number;
 - the name of their school and any other pertinent information.
- 3A.6** Once the Diabetes Hypoglycemia Emergency Action Plan has been completed, the documentation pertaining to each student having Type 1 Diabetes will include:
- legible photocopy of the form;
 - a clear photograph of the student;
 - his/her name and grade;
 - the name of his/her school;
 - his/her route number;
 - his/her medical condition;
 - the phone number of the parent/guardian and the family doctor; and
 - the location of the appropriate nourishment.

3B. When An Episode Occurs

- 3B.1** A seat in the first row located across the aisle from the driver's seat may be reserved for each student for whom RCJTC has received a request and a consent form to assist if the student experiences symptoms or insulin shock. This measure is strongly recommended for all students with Type 1 Diabetes.

3B.2 Whenever a student with Type 1 Diabetes seems to have problems during his/her travel on a vehicle:

1. The driver must:
 - a) stop the vehicle and ensure that it is completely immobilized (stopped and secured);
 - b) ensure that all passengers are safe;
 - c) assess the situation and determine whether the student requires assistance;
 - d) if it proves necessary to assist the student, do so and contact the dispatcher immediately to indicate the location of the occurrence and to request the parents/guardians and principal be contacted to meet the student upon their arrival at the school (a.m.) or designated stop (p.m.).

2. The dispatcher must:
 - a) confirm with the driver the time and location of the occurrence;
 - b) inform the principal and/or parent/guardian and the RCJTC;
 - c) remain in contact with the driver.

4. TRANSPORTING SERVICE DOGS

- 4.1 Service dogs are trained to assist children who have physical or developmental disabilities with their daily lives and living activities.
- 4.2 RCJTC recognizes that a student may require a service dog to be transported with them on a school purpose vehicle as part of their daily life and activities.
- 4.3 The Human Rights Code and the Ontarians with Disabilities Act cites the use of service dogs as a right of the individual.
- 4.4 Specialized transportation requests are approved on an annual basis only and must be reviewed each year.
- 4.5 The parent/guardian shall:
 - 1. Provide a letter to the Special Education Department outlining what they see as the benefits of having the service dog attend school with their child.
 - 2. Provide a letter to the Special Education Department from their doctor recommending the use of a service dog for their child at school.
 - 3. Provide a certificate of training from a certified training centre of service dogs.
 - 4. Provide the school with annual proof that the dog has been vaccinated, in good health and is licenced by the municipality.
 - 5. Assist in the training of the service dog to board, ride and alight the vehicle with their child prior to using the regular transportation service.
