

Pasta and Problem Solving

You are invited to a Family Spaghetti and Math night at George Vanier Catholic School on Tuesday, March 10, 2015!

What It Is: A spaghetti supper will be served in our gymnasium at 6:00pm. After supper, families will travel through the school completing a wide variety of math challenges. Upon completion of each challenge, you can mark your passport and move to the next. Once you have a full passport, you may enter the passport into a draw for a family prize and come back to the gym for dessert!

Most of the activities were designed by Ms. Landon as part of the Math Circus she created and our grade 4,5,6 students have been involved with the preparation for this evening. We hope to see each of our families! Grandparents, relatives and other community members are welcome too! In order to prepare the spaghetti, we do need to know how many people will be joining us, so please return the portion below by Friday, March 6th, 2015. There is no cost to families and the activities are suitable for all ages!

Thank you and we look forward to seeing you,

Maureen Enright and the Staff and Students of GVCS

+++++

The family members of _____

student name(s)

would like to attend the spaghetti and math night.

There will be _____ children and _____ adults attending (including the student(s)) listed above.

Please return form by Friday, March 6th.
